The expression Matriculation Certificate in this part of the instruction must be understood as including these alternative certificates.

Candidates will thus understand that the Matriculation Certificate is required in all cases as evidence of age, and it must invariably, be sent to the Commission, in original, with a copy thereof, together with the application.

Sometimes the Matriculation or equivalent Certificate does not show the date of birth, or only shows the age by completed years or completed years and months. The certificate submitted must be one issued by the authority (*i.e.* University or other examining body) awarding the particular qualification. If such a certificate or diploma is not submitted the candidate must explain its absence, and submit such other evidence, in original, as he can to support his claim to the requisite qualifications. The Commission will consider this evidence on its merits but do not bind themselves to accept it as sufficient.

N.B.—Candidates are warned that if an application is incompletely or wrongly filled or is not accompanied by any one of the documents mentioned under 4(ii), 4(iii), 4(iv) and 4(v) above without a reasonable explanation for its absence having been given, the application is liable to be rejected and no appeal against its rejection will be entertained. Any documents not submitted with the application but explanation for the absence of which has been given, should be sent soon after the submission of the application and in any case they must reach the Commission's office [except as provided for in Note under paragraph 4(iv) above] within one month after the last date for receipt of applications. Otherwise the application is liable to be rejected.

- there is no disease of the throat, palate, tonsils or gums, or any disease or injury affecting the normal function of either Mandibular joint;

N.B.—Simple hypertrophy of the tonsils, if there is no history of attacks of tonsillitis, is not a cause for rejection.

- there is no sign of functional or organic disease of the heart and blood vessels;
- there is no evidence of pulmonary tuberculosis or previous history of this disease or any other chronic disease of the lungs;
- there is no evidence of any disease of the digestive system including any abnormality of the liver and spleen;
- there is no hernia or tendency thereto;
- there is no hydrocele, or definite varicocele or any other disease or defect of the genital organs.

N.B.—A candidate who has been operated for a hydrocele will be accepted if there are no abnormalities of the cord and testicle and there is no evidence of filariasis.

- there is no fistula and/or fissure of the anus or evidence of haemorrhoids;
- there is no disease of the kidneys. Cases showing albuminuria or glycosuria may be dealt as under :—
- Albuminuria.*—Cases showing albuminuria should be investigated further by the medical specialist. Albuminuria may occur after change of posture (orthostatic albuminuria), after exercise or exposure to cold, due to fear of examination, or following sore throat. These conditions are benign and are not a cause for rejection. In such cases albuminuria is intermittent, there are no casts of RBC in the urine and there is no history of nephritis.
- Glycosuria.*—As a rule all cases of glycosuria should be rejected. Individuals who pass sugar in the urine throughout the day must be rejected. Cases of pseudo renal glycosuria containing sugar in the urine only after meals should be investigated

further by the medical specialist. Symptomless glycosuria in a young man is hardly ever due to diabetes mellitus. It should, however, be remembered that such cases are regarded as potential diabetics by some authorities.

- there is no disease of the skin, unless temporary or trivial. Scars which by their extent or position cause or are likely to cause disability or marked disfigurement are a cause for rejection;
 - there is no active latent or congenital venereal disease;
 - there is no history or evidence of mental disease.
- Candidates suffering from epilepsy, incontinence of urine, or enuresis will not be accepted;
- there is no squint or morbid condition of the eye or of the lids which is liable to a risk of aggravation or recurrence;
 - there is no active trachoma or its complications.

N.B.—Remedial operations are to be performed prior to entry. No guarantee is given of ultimate acceptance and it should be clearly understood by the candidates that the decision whether an operation is desirable or necessary is one to be made by his private medical adviser. The Government will accept no liability regarding the result of operation or any expense incurred.

3. Standards for Height, Weight and Chest measurements.—

(a) *Height.*—(i) The height of a candidate will be measured by making him stand against the standard with his feet together. The weight should be thrown on the heels and not on the toes or outer side of the feet. He will stand erect without rigidity and with the heels, calves, buttocks and shoulders touching the standard; the chin will be depressed to bring the vertex of the head level under the horizontal bar, and the height will be recorded in inches and quarter parts thereof. The minimum height for a candidate is 62" except in the case of Gorkhas, Nepalese, Assamese and Garhwali candidates for whom the minimum height is 60". Candidates who are otherwise fit in all respects but fall short of minimum height by half an inch or less, will be treated as special cases and relaxation allowed to the extent of half an inch.

(b) *Weight.*—(i) Weight will be taken with candidates fully stripped or with underpants only. In recording weight fractions of a pound will not be noted. A table showing correlation between height, age and average weight is given below for guidance.

Age Period	20—24	25—29	30—34
Height (inches)	Weight (lbs.)	Weight (lbs.)	Weight (lbs.)
62	109	113	116
63	112	116	119
64	116	119	122
65	118	123	126
66	122	125	128
67	125	129	132
68	129	133	137
69	133	137	141
70	137	141	146
71	141	146	151
72	146	152	157

(ii) It is not possible to lay down precise standards for weight in relation to height and age. The correlation table is, therefore, only a guide and cannot be applied universally. A 10 per cent departure from the average weight given in the table is to be considered as within normal limits. There may nevertheless be some individuals who according to the above standard may be over-weight but from the general build of the body are fit in every respect. The over-weight in such cases may be due to heavy bones and muscular development and not to obesity. Similarly for those who are under-weight the criteria should be the general build of the body and proportionate development rather than rigid adherence to the standards in the above table.

(c) *Chest*.—The chest should be well developed with a minimum range of expansion of 2 inches. The candidate's chest will be measured by making him stand erect with his feet together and his arms raised over his head. The tape will be so adjusted round the chest that its upper edge touches the inferior angles of the shoulder-blades behind and its lower edge the upper part of the nipples in front. The arms will then be lowered to hang loosely by the side. Care will be taken that the shoulders are not thrown upwards or backwards so as to displace the tape. The candidate will then be directed to take a deep inspiration several times and the maximum and minimum expansion of the chest will be carefully noted. The minimum and maximum will then be recorded in inches thus 33/35, 34/36, etc.

In recording the measurements, fractions of less than half an inch should not be noted.

4. *Dental conditions*.—It should be ensured that sufficient number of sound natural teeth are present for efficient mastication :—

(a) In order to assess the dental condition of an individual; teeth in apposition with corresponding teeth in the other jaw will be allotted points as follows :

(i) Central incisor, lateral incisor, canine 1st and 2nd premolar and under developed third molar
1 point each.

(ii) 1st and 2nd molar and fully developed third molar
2 points each.

When all 32 teeth are present there will be a total count of 22 points.

(b) A candidate must have a minimum of 14 dental points to be acceptable.

(c) The following teeth in good functional apposition must be present in each jaw :

(i) Any 4 of 6 anteriors.

(ii) Any 6 of 10 posteriors.

(d) Candidate suffering from severe pyorrhoëa will be rejected. When the state of Pyorrhoëa is such that in the opinion of the Dental Officer it can be cured without extraction of teeth, the candidate may be accepted. Candidates may be accepted if they have well fitting artificial dentures in lieu of sound teeth.

5. *Visual standards*.—The minimum acceptable standards of visual acuity are given below :

	Better eye	Worse eye
Distant Vision (corrected)	6/6	6/18
Near Vision (corrected)	J1	J6

Myopia of not more than —5.5D in any one meridian.

Hypermetropia of not more than +3.5D in any one meridian.

NOTES : (i) Fundus and Media to be healthy and within normal limits.

(ii) No undue degenerative signs of vitreous or chorio-retina to be present suggesting progressive myopia.

(iii) Should have good binocular vision, fusion faculty and full field vision in both eyes.

(iv) There should be no organic disease likely to cause exacerbations or deterioration.

Field of vision.—Normal in each eye as tested by confrontation test.

Colour vision.—Colour vision less than 'Defective' safe, (Ishihara plates) will be a cause for rejection. Substandard colour perception will be recorded as 'Below Defective Safe' and 'Defective unsafe'.

In all cases, where glasses are worn and where a candidate is examined by an Ophthalmologist, power of lenses must be noted.

6. *Hearing Standard*.—Should with the back to the examiner be able to hear a forced whisper at a distance of 20 feet with each ear separately.

7. The above physical standards will also apply to female candidates except for the following :—

(a) The height and weight need not conform to the existing height and weight table for men. Minimum height and weight should be 4' 8" and 80 lbs. respectively.

(b) The girth and the general development of the chest also need not conform to what is laid down in the existing physical standards for men. The candidate should, however, be capable of a chest expansion of 2".

APPENDIX III
